To Whom It May Concern

Subject: Project Summary Field Meter Collection Computers Compatible with Existing Systems

Please be advised the Vineland Municipal Utilities is advertising to replace its current field meter reading data collection computers. The current FC200 units are 10 years old and provided a reliable method for reading meters. The current units are now obsolete and are not coverable under maintenance. Due to the cost of replacing all 8 units currently in service, approximately \$40,000, a specification has been prepared for new Itron FC300 field meter collection computers. This item has been budgeted and we will not be paying for any maintenance services this year as the new units are covered under manufacturers warrantee. The collection computers are necessary to continue to read regular and now radio electric and water meters and will step us into newer meter reading technologies in the future.

If you have any questions please contact me know.

Yours Truly

MATERIAL HANDLER TRUCK REFURBISHMENT

SUMMARY OF BID REQUEST:

These bid specifications cover the scope of work for the refurbishment of **ED-0048, 2007 GMC 7500** cab and chassis, utility body and bed, the dismount and destruction of existing **LIFT ALL BOOM**, the furnishing and mounting of a new **ALTEC AN55E-OC** aerial lift equipped with **MATERIAL HANDLING JIB**, modifications to existing utility body, and the complete reassembly and delivery of the vehicle in operating condition to VMU yard located at 415 N West Ave, Vineland, NJ 08321.

This refurbishment will extend the useful life of vehicle by ten years, while improving the safety and performance of the aerial lift.
