## **Summary of Project**

## Open End Purchase and Supply of Natural Gas

Prepared by Steve August, Assistant Engineer x 4241

The purpose of this specification is to provide a contract to supply natural gas fuel to the Vineland Municipal Electric Utility for use as the primary fuel source for both the Howard M. Down Unit #11 and Clayville Unit #1 combustion turbines. The base contract term is two (2) years, and there is an optional two (2) year extension. The estimated yearly cost is \$4,720,000.

To Whom It May Concern

Subject: Project Summary Transformer Vault Repair

Please be advised the Vineland Municipal Utilities is advertising to rebuild a transformer vault located on the SE corner of Landis Ave. and 6<sup>th</sup> St. This spec has been advertised once before but received no bids. The aging vault is in very poor condition and is currently blocked from walking over for safety concerns. The work includes pouring a new lid, support beams, and using highway traffic rated grates. Due to the cost of this rebuild, approximately \$58,000, a specification has been prepared. This item has been budgeted for underground maintenance.

If you have any questions please contact me know.

Yours Truly

Stephen Hague, Assistant Engineer, Distribution

Vineland Municipal Electric Utility
