# OLD PLANT BASEMENT ASBESTOS ABATEMENT

## VMEU H.M. DOWN STATION

### PROJECT SUMMARY

This project involves services by an outside contractor for abatement and disposal of the asbestos insulation from steam turbines #4, 5 & 6 and associated piping located in the basement and turbine hall areas of the Old Plant in accordance with the applicable regulations. This section of the plant was built in the 1930's has been shut down since 1990.

An EPA/AHERA Licensed Asbestos Project Designer/ Inspector has been retained to provide necessary oversight and inspection services for proper execution of the project. He has also prepared the attached Technical Specifications for asbestos abatement of the subject areas.

Completion of this project will enable the removal of # 4, 5 & 6 turbines to free up floor space for possible renovation of this section of the plant.
