Summary of Project							
Repair of Fuel Metering Valve							
Prepared by John Lazzati, Principle Engineer x 4242							
<p>The purpose of this specification is to provide a contract for the repair of the Whittaker C521395-1 Fuel Metering Valve. Currently the valve in operation is a backup part which was damaged in a second ignition. The Utility has an additional valve that is damaged and needs to be reworked by a qualified company that has experience in Whittaker valve repair. This valve is specialized in nature and patented programmed with fuel curves installed by Whittaker. It is crucial that this valve is repaired for Unit 11 to properly run on oil in future operations. If there are any questions/concerns feel free to contact me.</p>
