Summary of Project

Specification for Traffic Control & Directional Drilling – Open Ended

To: Council Members

From: William Jenison, Engineer Trainee (Distribution)

This project covers Traffic Control & Directional Drilling services needed by the Vineland Municipal Utilities. The project specification details the requirements for traffic control services needed in order to setup safe work zones for utility construction workers. The specification also details directional drilling services needed for underground electric conduit repair. The initial period of the open-ended contract is for one (1) year with an option for extension of the contract for an additional period of one (1) year, in accordance to the Section C.14.B of the *Open Ended Control AND/OR Directional Drilling Services* Specification.
